

“

I am entering the final stretch of my senior year of enrollment in the Bachelor of Science in Psychology program at Arizona State University. After graduation, I will be applying to the Integrative Life Sciences - Behavioral & Statistical Genetics Concentration (PhD-BSG) program at Virginia Commonwealth University, which focuses on interdisciplinary research into the cross-section of the fields of psychology, psychiatry, neuroscience, and genetics.

Following immediately after, I plan to enroll in post-doctoral studies through the National Institute of Mental Health (NIMH) Training program.

Although it is still a long road ahead, and it has been a winding journey up to this point so far, this scholarship would help bring me one step closer to making my dreams a reality, and help me give back to the world in a meaningful way that I hope will make a difference in the lives of many others in the years to come"
